Naufal Nazeer

Software Engineer — Mobile & Web

Qatar | naufalnazeer059@gmail.com | +91 62826 49883 | portfolio.malabar-codeworks.com | LinkedIn | GitHub

PROFILE

IT Application Specialist with over 5 years' experience across mobile and web application development, with a strong foundation in JavaScript, TypeScript and the React ecosystem. Delivers cross-platform applications for iOS and Android using React Native, integrates them with back-end services and external APIs — including Firebase Realtime Database and Cloud Firestore — and manages builds through to Apple App Store and Google Play release. Combines component-based, state-driven UI development with a background in technical support and troubleshooting, and a track record of researching and evaluating new tools for the organisation.

EXPERIENCE

Software Engineer (Mobile / Web)

Applab, Qatar · Present

- Develop cross-platform mobile applications using React Native, JavaScript, and TypeScript, applying component-based architecture and reusable UI patterns consistent with modern React development practices.
- Design and implement intuitive, responsive user interfaces, translating UI/UX designs into functional, accurate components.
- Contributed to the QLC project, building and maintaining React-based UI components.

Code Quality & Modernisation

- Improved code quality, maintainability, and scalability by upgrading React Native versions and migrating JavaScript codebases to TypeScript across multiple projects.
- Stay up-to-date with the latest trends, tools, and best practices in the React and JavaScript ecosystem.

Senior Software Engineer (Mobile / Web)

Citrus Informatics (India) Pvt Ltd, Kerala, India · 2022 – 2024

Mobile & Web Application Development

- Built and maintained multiple cross-platform applications using React Native and JavaScript, owning requirement analysis, component development, and coordination across the development lifecycle.
- Developed several internal and client-facing products — including a hybrid chat application (POCN), an Islamic content app (Alim Quran and Hadith), an iOS wellness app (AviveLife), and a travel booking app (AirbookOne) — using reusable, state-driven UI components.

Application Integration & APIs

- Integrated Firebase as a backend, working with Firebase Realtime Database and Cloud Firestore to power data-driven React components.

Build & Release (Basic DevOps)

- Managed version control and build configuration across the React Native release cycle.
- Deployed and maintained production React Native applications on Google Play Store and Apple App Store, including environment and release configuration.
- Identified and resolved performance issues and defects across cross-platform builds prior to release.

Career Consultant

Dreams Career Guidance, Ernakulam, India · 2019 – 2022

- Conducted individual career counselling sessions to understand client needs, goals, and challenges.
- Administered and interpreted career assessments to identify skills, strengths, and interests.

Technical Support Engineer
Keltron, Trivandrum, India · 2017 – 2018

- Installed and delivered training on development tools, and troubleshot technical issues for customers on embedded and analog development tools.
- Provided guidance on installing and integrating new hardware components and software for remote clients.
- Assessed system hardware and software and suggested modifications to reduce lag time and improve overall speed.

PROJECTS

POCN Hybrid Chat App — *Citrus Informatics*
Built a hybrid real-time chat application using React Native, implementing reusable, state-driven UI components and integrating with backend messaging services for a smooth cross-platform chat experience. Technologies: React Native, JavaScript.

Alim Quran & Hadith App — *Citrus Informatics*
Developed a cross-platform Islamic content application delivering Quran and Hadith content through a clean, component-based React Native interface optimised for readability and offline use. Technologies: React Native, JavaScript.

AviveLife (iOS) — *Citrus Informatics*
Built an iOS wellness application using React Native with Firebase as the backend, implementing dynamic, data-driven UI components powered by Firebase Realtime Database and Cloud Firestore. Technologies: React Native, Firebase.

AirbookOne — *Citrus Informatics*
Developed a travel booking application using React Native, building reusable UI components for browsing, booking, and managing travel itineraries. Technologies: React Native, JavaScript.

QLC Project — *Appstation Pvt. Ltd.*
Contributed React-based UI components and features to the QLC project, using React Native, JavaScript, and TypeScript within a component-driven development workflow.

EDUCATION

B.E. in Computer Science & Engineering
Anna University, Chennai, Tamil Nadu, India · 2013 – 2017

CORE SKILLS

- React.js
- React Native
- JavaScript
- TypeScript
- Node.js
- Firebase (Realtime DB & Firestore)
- REST APIs
- Ionic-Capacitor

TOOLS & PLATFORMS

- Android Studio
- Xcode
- Firebase Console
- Google Play Console
- App Store Connect
- Twilio

DEVOPS & DEPLOYMENT (BASIC)

- Git / Version Control
- Build Configuration (Gradle / Xcode)
- App Store & Google Play Release Management
- Environment & Release Configuration
